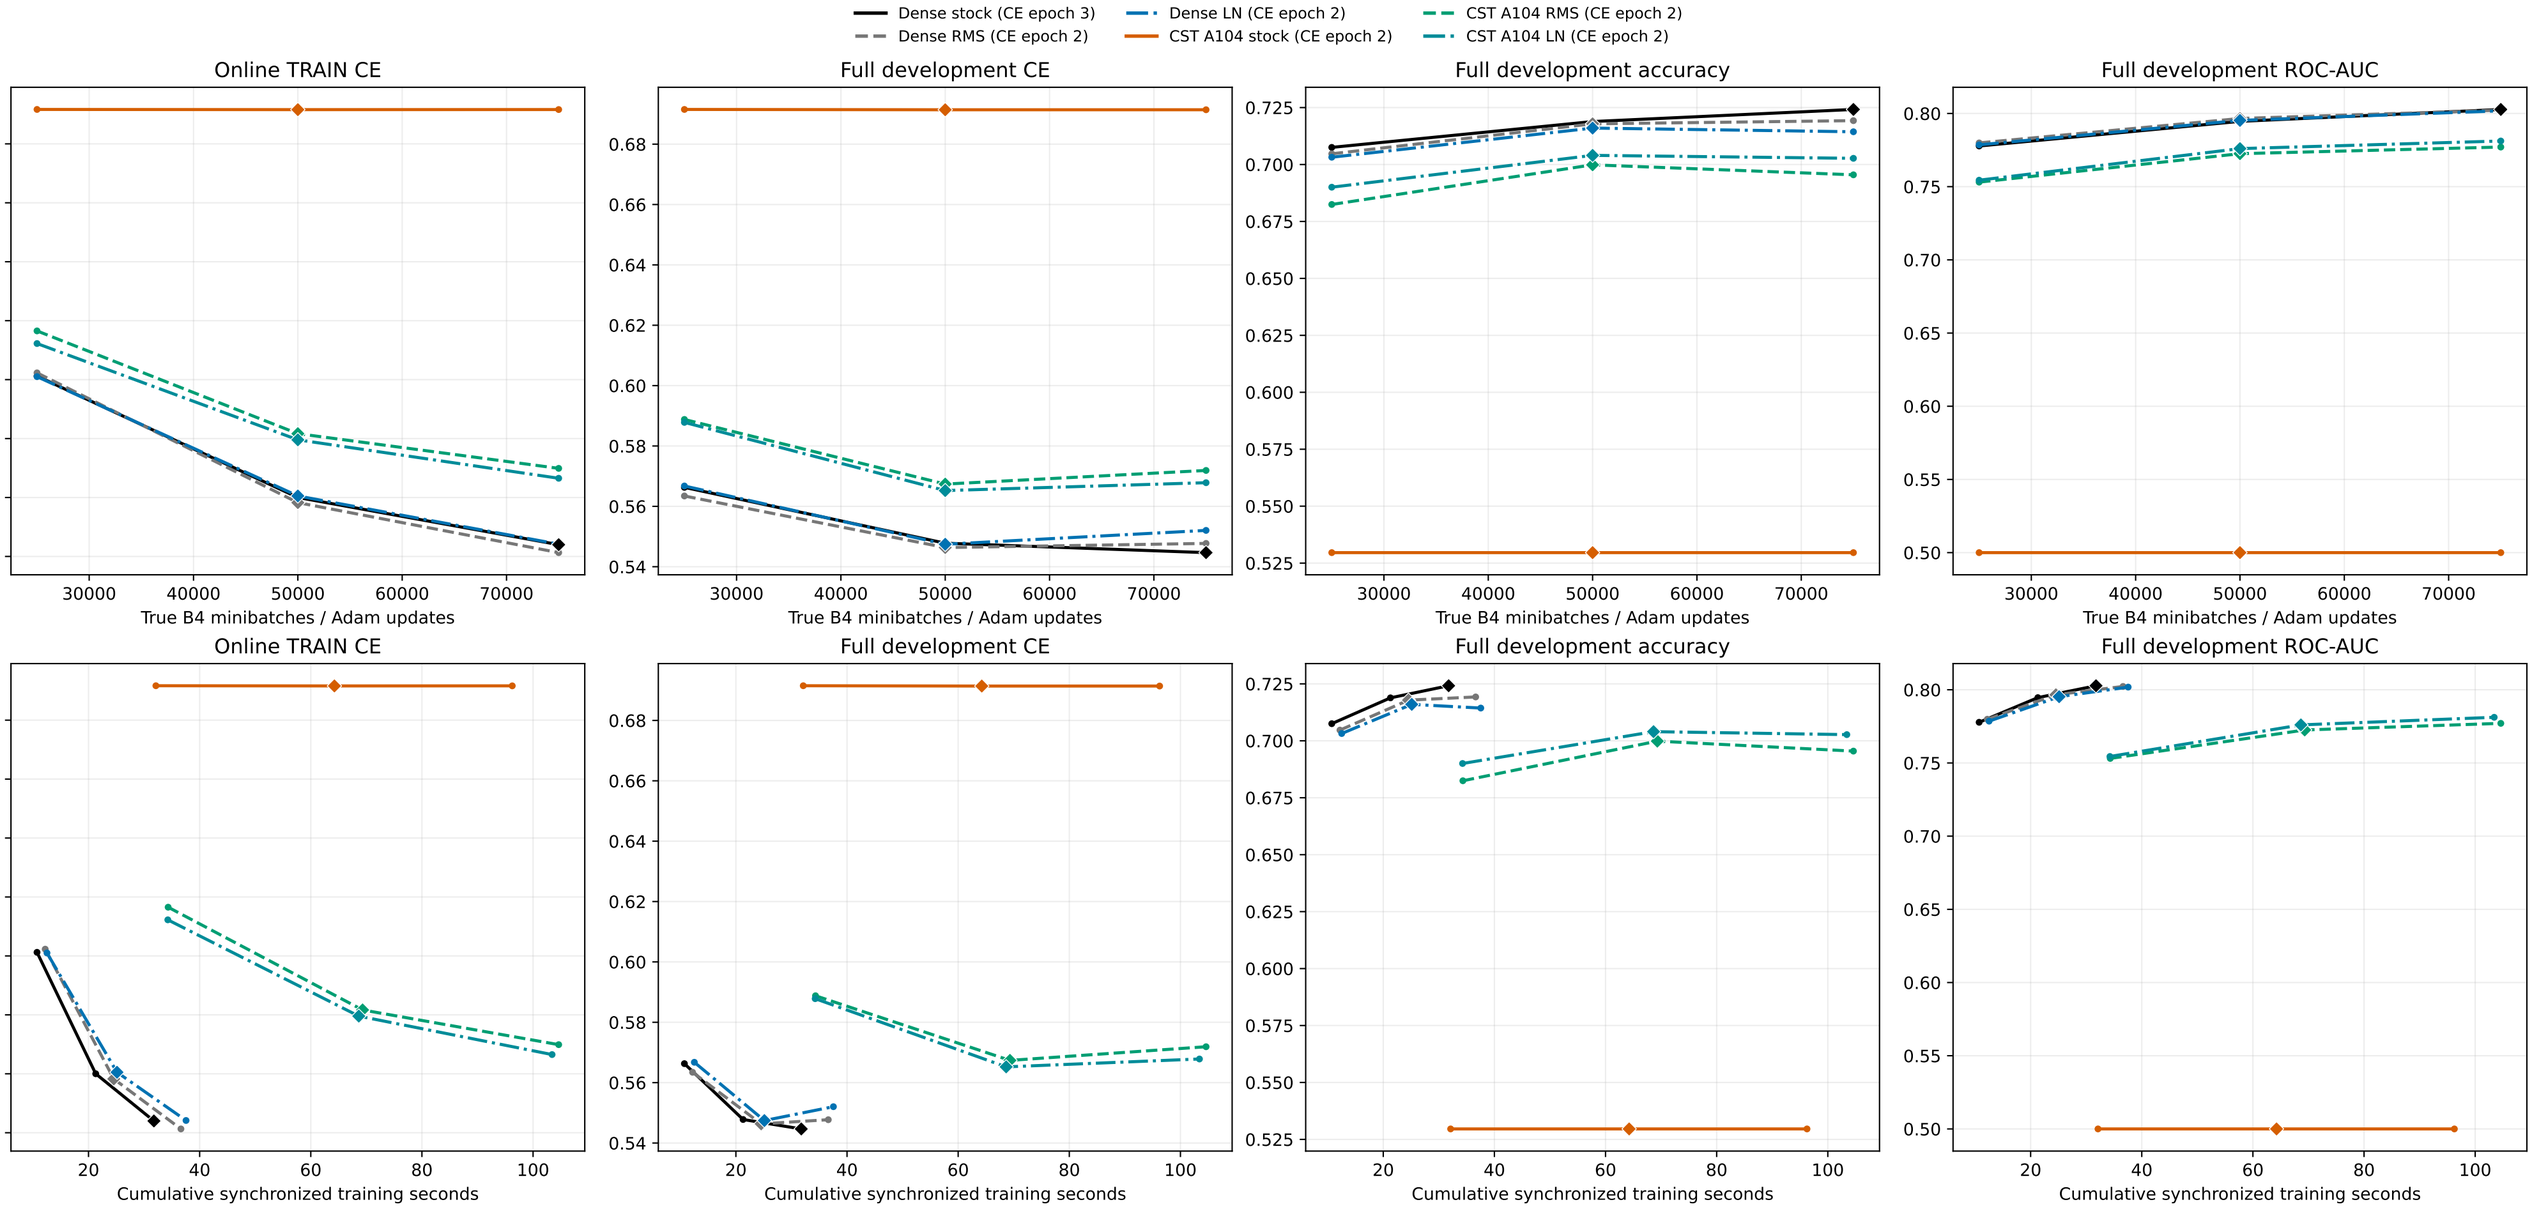
HIGGS depth normalization | N=1024 | three hidden squares | seed 17 | 3 epochs | fixed LR 0.0003 | eager FP32

EXPLORATORY DEVELOPMENT; confirmation/test not scored. Earliest minimum full-DEV CE selects one checkpoint; no mean/CI/NI.

TRAIN curves are online epoch means; selected full-TRAIN100k evaluation is in the table. Diamonds mark the selected DEV-CE epoch.


Mixed lineage: parent ea0 trained four cases; correction32428 trained five fresh cases. Training seconds exclude preparation/evaluation/checkpoint work.
